

... a PEEK at the new  
streamlined, diesel-powered

# Meteor

ST. LOUIS • TULSA • OKLAHOMA CITY

**JUST A PEEK** — that's all — at the luxurious Diner - Lounge - Observation Car on the Meteor ... to give you a hint of the solid comfort you'll find throughout this train-of-trains. The Texas Special, too — another great new Frisco streamlined Diesel-powered train, brings you the same beauty and luxury — the same warm hospitality — good food and friendly service.

"I've Seen the  
newest, smoothest  
thing on Rails!"

SAYS FOREIGN CORRESPONDENT

**Travel luxury** — Railroad history's in the making! The Meteor! Not just another streamliner — but a super train! So beautiful, you'll think you're dreaming when you board it ... So quiet, so comfortable, so far advanced in every feature — it's a miracle on wheels — a wonder train!

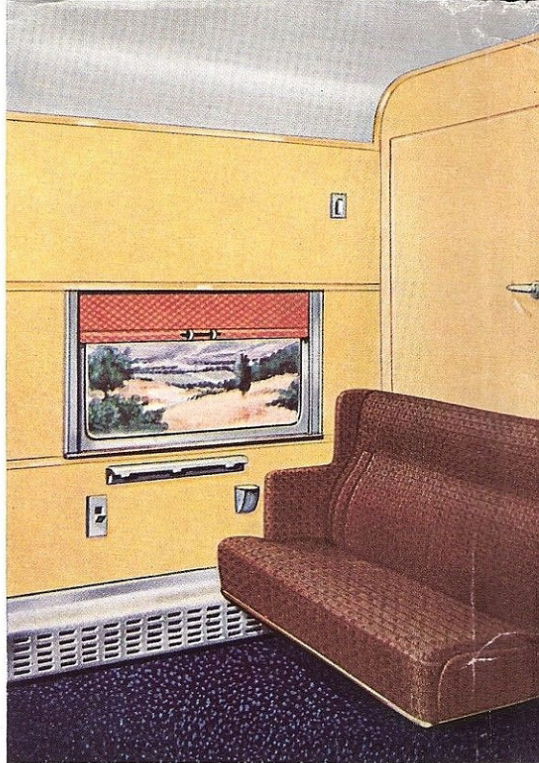

**Privacy** — Every bed enclosed in a room. Roomette or bedroom privacy for all sleeping car passengers. Two bedrooms — each with separate enclosed lavatory-toilet facilities, combine to make a spacious "drawing room." Retire when you like. Get up when you like. No sleep-disturbing "aisle-tours" ... No waiting! No crowding! No early rising to avoid public dressing-room jams.

**Eyes rest, too** — No glare, day or night. Frisco has spent millions on its new streamliners — not for "ballyhoo" — but for you! ... To get you there feeling like a million! The eye specialists said, "Get rid of glare — and you'll cut travel fatigue!" Result: Windows throughout the Meteor are free from glare ... And new "wonder lighting" directs light where needed ... not in your eyes.

**AMAZINGLY CONVENIENT BEDROOMS** — Your headquarters for sound sleep — provide the comforts that make your entire trip a treat . . . good beds — comfortable seats — enclosed wardrobe — personal "climate" control . . . and entirely closed-off lavatory-toilet.

**ROOMETTES FOR RELAXATION** — Day and night you can rest in peaceful privacy. Lavatory . . . toilet . . . individually controlled air conditioning. And a wonderful bed you can easily draw into position or raise out of sight without calling the porter!

**"More Luxury  
than I ever  
dreamed of!"**

SAYS FAMED NOVELIST

***Smooth power*** — For smooth starts . . . gliding-in stops — modern Diesel power! Clean . . . Quiet . . . Fast! . . . with every miracle of modern engineering that could contribute to your comfort and enjoyment. A thrill to watch . . . a greater thrill for passengers. Now you can know the fun and excitement of traveling over Frisco's gleaming rails behind a 4,000 horsepower Diesel giant . . . a travel treat you'll never forget!

***Perfect climate*** — Delightfully cool in summer . . . warm and snug in winter! New air-conditioning miracles provide Meteor passengers with plenty of good, fresh circulating air — filtered and conditioned to just-right temperature. Each bedroom and roomette has individual temperature control. Just one of the many reasons why you'll say, "It's a great life, traveling on the Frisco!"

***Quiet*** — Every car "sound-conditioned." You'll chat without shouting, and enjoy conversation! . . . And sleep! This wonder train's "north woods" quiet is achieved by new "sound-conditioning" methods . . . to filter out the last possible bit of noise and vibration.

A GLANCE into the Chair Lounge with the Sleepy Hollow seats that cost \$50,000 to perfect! No "coaches" on the Meteor or Texas Special. Luxury at coach fares. Only Frisco railuxury liners in the Southwest have the seats that "tailor to your measure"—at the touch of a button.

**Regal comfort**—You'll be king—and ride like a king! No extra-fare for the pillowed head-to-toe luxury of Sleepy Hollow Seats... So revolutionary, Life magazine carried a full story of the \$50,000 research that resulted in this marvel—a seat that lets the entire body relax! Only Frisco super-streamliners—of all trains serving the Southwest—have it!

**Beautiful**—So new... So thoroughly in key with the rich traditions, the color and atmosphere of the great Southwest... The epoch-making Meteor has no counterpart in all America! It's today's biggest travel news... destined to keep right on making history. And for the last full measure of travel pleasure—Friendly Frisco service!

"Full of Firsts from Diesel Engine to Observation Car!"
